Projects

- **Smart vehicle for physically challenged peoples**
  In our project was mainly using their leg tilt movement, the handle bar control can be done with the help of rod connected between the leg and wheel.This is the clutches system so there is no need of gear change. Instead of mirror alignment we are using the AV video camera.

- **Design of Microstrip Antenna**
  Single band E-shaped microstrip Patch Antenna array has been designed for high speed wireless local area networks and other wireless communication systems covering this frequency band like WiMax and C band with the low-profile microstrip antenna with stable radiation pattern in a relatively wide band is presented for 5G operation.
